NAILS
GROUP

Brand Book

I, Julia Zvarich,
represent the
brand of your
possibilities!

JZ NAILS GROUP –

is a long-term experience, manifestation of strong ideas, exclusive quality, and unique abilities. It is a collaboration of the progressive school and high technologies of the trademark, passion for the profession that I express in every JZ product. I aim to reach the single goal — to create ideal conditions for your progress. For each nail professional to reach the highest level in their professional growth.

ABOUT THE BRAND

My world of ideal materials. Where each product works for a nail artist. Thanks to working with European factories, the JZ NAILS GROUP brand ensures the highest quality and applies unique technologies. I have created each product having in mind its unique purpose. From a safe keratolytic lotion to a perfect modeling system.

My passion for the quality, color, and viscosity of each product emphasizes its specific nature and uniqueness. It is its quality that has determined its purpose — to work for you, allow you to throw your heart and soul into work, ensure the maximum quality even with the minimum quantity, and show your professionalism.

COLOR GEL POLISH

It is a fragrance- and aldehyde-free product!

SPECIAL LIQUIDS

2,17€ NAIL PREP

is a dehydrator!
It is used for evaporating surface moisture and cleansing of both natural and artificial nails. The dehydrator is used to prepare natural nails for applying gels, acrylics, and gel polishes. The dehydrator is a product for removing excess moisture from the natural nail plate. By the aid of butyl acetate, it does not affect the pH balance and has a high evaporation rate. It does not replace primer or ultrabond.

Apply to the nail area, wait for complete evaporation. It can be used for application up to 10 times.

5,78€ ULTRABOUND

is an acid-free primer that provides adhesion of the natural nail with artificial material by functioning as a double-sided tape. It does not imbalance the pH of the nail plate and has antiseptic properties. Improved formula, purified ingredients!!! Apply the product on the nail plate with a squeezed brush.

Allow to air dry for 30 seconds.

4,34€ QUICK CARE

Volume: 10 ml
This is a new generation professional cosmetic product for manicure and pedicure technicians. Its special formula provides instant healing and antiseptic protection for damaged skin without pain, stinging, or oxidation.

Key Benefits:

- Fast Action: Stops bleeding and soothes the skin within minutes.
- Antiseptic Effect: Prevents the development of inflammation and infection.
- Safe Formula: Suitable for all skin types, with no harsh odor.
- Application: Apply using a microbrush to the damaged area of the skin.

10,12€ CLEANSER

Volume: 255 ml
It is a multi-purpose product! It is a perfect product for removing the dispersion layer and caring for gel brushes. The product is hypoallergenic, does not cause irritation and allergic reactions, because it does not contain solvents and acetone. It has antiseptic properties. It suits perfectly for working with acrylic gel and polymer gel without compromising the properties of these products.

12,52 € KERATOLYTIC UREA&ENZYMES

An innovative formula for working with various types of skin during manicure, including atopic ones (dermatitis, eczema, psoriasis, and open wounds).

The composition enriched with enzymes (bromelain, papain, allantoin) and provitamin B5 (panthenol) stimulates the exchange and regeneration of epidermal cells, reduces inflammation, and relieves swelling. Panthenol is not only a conductor of water to the deeper layers of the epidermis, but it also accelerates the production of collagen. Due to the presence of lactic acid in the product's composition, the skin remains hydrated even after the removal of the product.

- It works ONLY WITH SKIN...
- It does not make the nail plate lose!
- pH 6.8
- It allows working with all fingers at a time!
- For all manicure techniques!
- With or without the use of the cutter.

Apply to the cuticle area (the product can be applied on all the fingers at a time), the exposure time characterizes the features of the skin. From 10 sec to 60 sec. A sponge soaked with water can be used to maintain moisturizing. If necessary, the product can be applied repeatedly to already treated areas.

No neutralization is required.

Residues are removed with a damp sponge.

7,47 € HAND SANITIZER

The product protects the transepidermal barrier of the skin, creates a protective mantle on its surface.

It has an unobtrusive, pleasant aroma, it is easily distributed over the skin, creating invisible armor and protecting the skin of your hands from pathogenic organisms!

It is a reliable antiseptic for your hands ▼
Safe to your skin ▼

80% ethyl alcohol
NO STICKY FEELING

LIQUID ALL IN ONE 20,47 €

Is a multi-purpose product for degreasing, disinfecting, and dehydrating the natural nail plate before applying any type of artificial coating: varnish, gel polish, gel, polymer gel, and acrylic. Due to the purified composition of solvents, it prevents chips and detachments of the material, and it has an increased antiseptic effect. The product is ideal for working with polymer gel, it does not affect the consistency of the material and perfectly cleans the brushes. It is a multi-purpose tool for professionals.

Avoid contact with the mucous membranes, as well as prolonged contact with the skin.

REMOVER

Volume: 100 ml

It is used to remove gel, polygel, and gel polish.

It ensures safe work during material removal using the SOAK OFF technique (*soaking*). Due to the purified formulas of solvents, it comes into contact only with the polymer. **It does not dry the nail plate.** It contains peach pit oil and castor oil to protect the skin around the nail wall and hyponychia.

Exposure time is 5 to 15 minutes depending on the polymer.

FUNGICIDE 7,71€

First aid and support!

Latest product for the restoration and protection of nails from fungal infections, prevention of onycholysis, for nourishment and hydration of the nail due to features of lactic acid and effective antiseptic and fungicidal properties of boric acid. The first assistant contained in the product is lactic acid, it is an alpha hydroxy acid (AHA) that is related to the skin and makes part of its water-lipid layer. It has a pronounced moisturizing effect due to its ability to bind water molecules. In addition, lactic acid naturally improves skin and nail elasticity.

Second assistant

is boric acid, an excellent antiseptic that effectively heals burns, cracks of the nail plate.

Therefore, FUNGICIDE is an ideal product for the restoration of the nail plate, prevention and treatment of fungal diseases in addition to the recommendations of podiatrists.

Prevention:

Apply the product on the nail plate and cuticle for 3 minutes or wait until it dries completely, remove the residue.

Treatment:

Apply the product on the affected areas of the nail plate, wait until it dries completely.

Repeat the procedure every other day. The duration of the course is up to one month.

It is recommended to use the product before the manicure or pedicure procedure.

The product is most effective as part of the complex therapy of fungal infections of nails.

*For external application only!
Avoid contact with eyes.*

Features:

- Antifungal agent
- Cleaning agent
- Anti-inflammatory agent
- Moisturizing agent
- Healing agent

IT IS NOT A MEDICAL DRUG.

SKINCARE

ENJOY LOTION

It is the first perfumed complex care with silk peptides. This nourishing and moisturizing lotion is necessary to maintain the health and well-groomed appearance of the body skin. It strengthens skin, makes it more elastic, prevents its dryness. It has the flavor of an exclusive perfume and makes the scent reveal itself on each skin individually due to the opening of the granules. Jasmine and crisp, juicy apple with a hint of sweet and sour berry sorbet with honey appear at the beginning of the perfume composition.

Then other accords are revealed: bright white lily of the valley and sweet orange citrus. And in the base, the fragrance reveals fruity-woody notes. Thanks to the addition of silkworm cocoon proteins, the lotion has protective properties and maintains the optimal level of hydration. In turn, bioactive substances of plant extracts activate metabolic processes in the cells and improve breathing.

6,26 €

100ml

3,97 €

ENJOY HYDRATION

Volume: 30 ml

The cream has a delicate structure, softens the skin and provides its instant hydration for 24 hours. The product is enriched with a unique complex of shea oil and peony extract. Collagen nourishes, penetrates into cells and soothes irritated, reddened skin, forms a protective film that eliminates the problem of dry hands. Elastin promotes cell regeneration that speeds up skin recovery. The cream has a pleasant floral aroma. It is suitable for home and professional care, can be used for hand massage. Due to the rich content of triglycerides contained in fatty acids of shea oil, this product has high plasticizing properties and penetrates through the stratum corneum.

- It protects the skin against UV radiation.
- It accelerates regenerative processes.
- It reduces peeling, prevents drying.
- It softens the skin.
- It stimulates collagen synthesis.
- It increases skin elasticity.
- It relieves irritation, helps reduce redness.

This is a deep-acting preparation containing highly effective peptides and peony extract. These components can penetrate into the deep layers of the epidermis, starting the recovery and rejuvenation processes.

3,97 €

ENJOY RECOVERY

Volume: 30 ml

The cream has a delicate structure, caused softening effect and provides instant hydration and restoration of the skin for 24 hours. It has a prolonged effect. The product is enriched with a unique complex of active components. It contains the snail extract that nourishes dry and irritated skin, stimulates the production of its own collagen and elastin, which eliminates peeling. Shea oil moisturizes and restores the loss of amino acids, strengthens nails, softens the skin, increases its elasticity.

The cream has a pleasant floral aroma. It is suitable for home and professional care, can be used for hand massage. It accelerates the renewal of the epidermis. The cream contains the Allantoin enzyme that provokes the dissolution of dead cells of the skin, thereby renewing it.

- It is an effective antioxidant, and therefore it reduces and eventually completely neutralizes harmful effects on the skin, slowing down the process of cell aging.
- It heals and restores the barrier properties of the epidermis.

This cream is perfect for people with delicate and sensitive skin, as well as with problem-prone skin, such as dermatitis or psoriasis.

CUTICLE OIL

Cuticle oil with Lanolin JZ Nails Group™

- The product helps strengthen the nails.
- It protects from negative external influences.
- It ensures additional hydration and retention of moisture in the skin.

- Jojoba oil is a truly unique product that contains a natural protein that resembles collagen in properties. Due to the small size of the molecules, the protein penetrates the deep layers of the epidermis and enhances the generation of our own collagen, thereby helping to create a subcutaneous “frame” and maintain youthfulness, firmness, and elasticity of the skin.

- Jojoba oil contains vitamin E in high concentration. This vitamin is an antioxidant that helps cells prevent aging and neutralize the harmful effects of toxins on the skin.

- The product is completely hypoallergenic that allows it to be used in cases of atopic dermatitis, psoriasis, and burns.

- It penetrates deep into skin cells and creates an invisible breathable film on the skin surface that helps retain moisture inside the skin and prevents the epidermis and dermis from drying out, as a result, the skin looks well-groomed and hydrated without having oily sheen. Jojoba oil can be used both in its pure form and as an additive to products for caring skin not only of the hands, but also of the face.

- Due to its stable molecular structure, it has a long shelf life.

In addition, this oil stimulates skin regeneration, has antimicrobial and antifungal properties!
 At the molecular level, jojoba oil is not an oil, it is a wax.
 Although it is absorbed very well by the skin, its waxy nature allows creating a soothing protective layer on the skin. It does not irritate the skin.

The composition includes a complex of organic oils and castor oil.

Storage: 24 months

At a temperature of 17-25°C

GEL & POLY GEL

POLY GEL

Volume 30/50 ml

All the best qualities of a unique formula are presented in one product. It is lighter, stronger, and more elastic than any acrylic or gel in the nail industry. It allows strengthening the nail plate, because, due to its formula, it is elastic and allows making extensions on tips and modeling on the forms and upper forms at any speed that is comfortable for the manicurist. When applied to the nail plate, it does not spread and does not self-level. It allows working with the minimum laying of the material; it is compatible with any pigmented and glitter gels for creating the desired color. It does not have perforation. The product has excellent adhesive qualities and the natural appearance of the pigment. It polymerizes in the LED or UV devices with the minimum dispersion layer. *During polymerization, it does not cause a burning sensation of the nail plate.*

QUARTZ COLECTION

Tenderness and grace in every jar ...

Polymer gel with delicate perforation. It has the function of self-leveling, the ideal density of the pigment with the addition of fine shimmer. The unique material is easily manageable, dries quickly, has no bubbles or grains, does not shrink, is compressed, and holds the arch for the entire period of wear. It is perfect for the French modeling, as well as for covering natural nails and creating the Baby-boom design solution. Its workflow is the same as for polymer wax! It is mandatory to use an elastic base substrate on the natural nail!

GEL CONSTRUCTOR **11,08€**

Gel constructor is intended for working with the free border of the nail plate in the technique of “thread repair”!!!

This composite, structural gel of a new generation allows to easily and most importantly quickly grow the free edge!

The gel constructor is highly resistant to stress, but at the same time it does not weigh down the free border that allows working with long nails!

Polymerization time: 60/90 sec – 365 nm

NO TPO

BUILDER GEL

Volume 30/50 ml

Is a structural camouflage gel of a neutral powder shade. The product has a medium viscosity, is thixotropic, and is self-leveling. It is suitable for techniques without filing and techniques of creating the permanent French. With the high skills of the manicurist in modeling techniques, it is suitable for creating an elongation wall and competitive French. Due to the minimum material, there is no loss of pigmentation. It has high wear resistance after the polymerization process.

BASE FIBER

Volume 15/30 ml

The product is created based on the latest achievements in the field of chemistry of acrylic oligomers and monomers. It is a durable base for gel polish with nylon fibers. It is the first base fully adaptive to the surface.

During polymerization, it is reinforced with fibers that make it more stress-resistant and stronger than a conventional base coat. The optimal viscosity and fluidity of the gel allow filling all the microcracks in the nail plate.

Due to its unique curing properties, it is ideal for weak and sensitive nails.

Finally, you can make a choice! There is the possibility to choose your FIBER in favor of strength and the minimum thickness of the laying at own discretion.

8,67€ BASE CONTROL

Glue base for tips is created specifically to ensure super-resistant adhesion to polymer tips and it is safe for the nail plate. It is ideal for using as primer coating. It does not provide excess thickness when attaching tips. It provides the maximum bond strength due to cyanoacrylate monomers. It can be used as a stand-alone coating or as a primer for gel systems. On the prepared nail, apply a priming layer of the base.

Leave to polymerize for 30 seconds.

Apply the required amount of the base to the contact area of the tip, press it tightly against the nail plate.

Perform fixation.

*Leave to polymerize for 60 seconds. 395 nm

DECOR GEL MIRACLE

Volume: 15 ml

Shiny gels for nail decoration

- perfectly correspond to the techniques of laid-out french manicure and surface covering,
- are suitable for any coatings, including gel polish, gel, polygel, and tips.

If necessary, we recommend light sanding with a buff before covering with the top.

Polymerization is 60 seconds in the LED lamp.

DECOR GEL ART PAINT

Berry

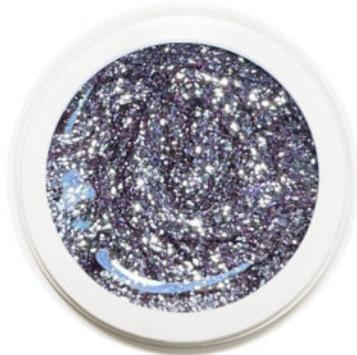

Black

Blueberry

White

Dark gold

Volume: 15 ml

The ART PAINT collection of gels for decoration is presented in five rich colors with the deep expressive pigment, two of which are base ones — **Black&WHITE**. It is a finished product with extremely high coverage and medium consistency, it perfectly suits for many decorating, painting and French manicure techniques. It allows creating accurate thin lines and decorations, french pattern and unique ornaments.

The paint is characterized by high resistance to mechanical damage, gels do not spread. The gel paint leaves a sticky dispersion layer and is ideal for decorations with foil that is applied to the already hardened pattern.

FEATURES:

- Excellent pigmentation;
- Perfect coverage;
- Formation of the dispersion layer in 30 sec.
- It hardens in 60 seconds.
- No dispersion layer;
- Medium consistency for perfect smoothing-out .

3,61€

DECOR GEL KALEIDOSKOPE

Volume: 15 ml

The Kaleidoscope decor paste is characterized by high resistance to mechanical damage, the gel does not change viscosity, its high pigmentation guarantees perfect coverage.

It is applied to the UV-gel or basic hybrid coatings.

HOW TO USE:

Apply a small amount of gel to the pre-prepared nail and decorate with a thin brush. Hardening of the gel: 2 minutes in the 36 W UV lamp or 30 seconds in the 48 W LED lamp. In the case of very complex patterns, it is recommended to dry the decor fragments separately. The gel can be used to create convex decorations, for this it is necessary to apply several thin layers of gel and polymerize them. Hardened gel requires wiping with a cleanser.

IQ PODO DISK

This is an indispensable tool for foot treatment in modern aesthetic pedicure. It significantly speeds up skin treatment and pairs perfectly with techniques involving KERATOLYTIC IQ PODO. The disc diameter is 20 mm. The glossy disc is compatible with all models of nail drills (electric files). The disc is made of high-quality medical stainless steel, resistant to corrosion, and can be easily disinfected and sterilized in both dry heat sterilizers and autoclaves. The edges of the disc are rounded, preventing skin injury.

Instructions for Use:

Install the disc attachment onto the device, adhere a disposable abrasive file to the working surface, perform the pedicure procedure. After the procedure, dispose of the used file and send the disc for a full range of disinfection and sterilization treatment. For a new client, use a new file and a new, sterile disc!

3,13 €

PUSHER REFILL FILES – 240 GRIT

This is a set of disposable files for cleaning the cuticle and preparing the nail plate before coating. They are ideal for use in the European manicure technique and manicure without the use of an electric drill. They are very convenient to use, making it easy to treat the surface of the nail plate in the lateral folds and the cuticle area. The abrasives have a good adhesive base, which is important for work. The grit of the abrasives is 240 grit, which is safe for the nail surface. After treatment with the file, the use of a buffer is recommended.

One abrasive file is sufficient for all 10 fingers.

1 file = 1 manicure!

The set contains 10 plates, each with 10 files = 100 safe manicures.

3,49 €

JZ CARTRIDGE BIT (PATRON)

The CARTRIDGE bit with combined abrasiveness (blue-red) is designed for treating both soft and hard skin, making it a universal tool for various manicure and pedicure procedures. Thanks to its professional shape, it is maximally versatile and utilizes the entire working surface. It is ideal for working with the cuticle, lateral folds, and the sub-cuticle area. Where a flame-shaped bit is too long on the working part, the CARTRIDGE is the perfect fit! It is ideal for e-file manicure using the "one bit" technique. It is also used for pterygium removal and grinding calluses and corns.

Specifications:

Working part diameter: 2.3 mm

Working part height: 8 mm

Overall length: 45 mm

Features:

Double diamond coating ensures uniform grinding and increased tool durability.

Suitable for treating both soft and hard skin, allowing work with different skin and nail types.

2,89 €

JZ FLAME BIT

The diamond manicure bit in the Flame shape, with combined abrasiveness (blue-red) and natural diamond coating, is designed for use on both soft and harder skin. This makes it a more universal tool for both manicure and pedicure procedures. It is ideal for treating the cuticle, lateral walls (sidewalls), and the entire perionychium. It is also used for cuticle removal and grinding corns and calluses.

Specifications:

Working part diameter: 2.3 mm

Working part height: 8 mm

Overall length: 45 mm

Grit: Blue-Red (mixed abrasiveness)

Features:

Double diamond coating ensures uniform grinding and increased tool durability.

Suitable for sterilization in both an autoclave and a dry heat sterilizer.

Suitable for working with both soft and hard skin, allowing its use for various skin and nail types.

AUXILIARY TOOLS

GEL TIPS 13,97€

These are universal, elastic polymer tips with a perforated contact zone that provides better adhesion to the material used for adhesion in TIP technology. They are suitable for working with any type of coatings: gel polish, gel, polymer gel, and acrylic.

They are recommended to be used for:

- Mechanical and chemical preparation of the nail;
- Application as thin primer coat;
- Polymerization of BUILDER GEL CLEAR – 60 sec.
- Apply the required amount of BUILDER CLEAR GEL in the contact area of the tip.

” Fix for 2 s. If necessary, use a plastic fixing agent.
 Polymerization in the UV/LED lamp: 60 s.

9,87€ SILICONE MOLDS “JZ SILICON NAIL MOLDS”

These are silicone stencils for creating the smooth, perfect smile line in the technique of working with upper forms. It is a real revolution in the Dual Form system! The molds are available in 5 sizes that allow adjusting the smile line to any shape and length of the nails. All you need to do is to insert our Mold into the Dual Form, place the products you want to use for French modeling in the free space.

It is the best solution to clean the mold from the remains of the material with tape or a roller for stamping.

The molds are available in the following forms:

Malmond and short almond are intended for nails, the free edge of which is narrowed, for example, the almond or ballerina forms.

- The almond form is intended for long nails,
- the short almond form is intended for short nails.

The oval and short oval forms are intended for nails with the parallel free edge, for example, the square edge.

NEW

UPPER FORMS FOR BUILD-UP

7,10 €

Dual Form JZ NAILS GROUP are soft and flexible forms for nail extensions not only in the ballerina form, but also in the almond, oval and square forms.

They need acrylic, gel or polygel. As far as gels are concerned, thick gels from our Builder Gel system are the best solution. Nail extensions have never been so easy.

If you care about the perfect shape of your nails, the same length and the perfect C-bend, we recommend our top forms.

The stencils ensure the perfect **shape of your nails**.

The stencils are plastic, which **makes them reusable**.

They are recommended for all types of nails. They allow making a quick and spectacular manicure with an ideal top and curve of the arch. The forms are reusable, they can be easily detached from the mass of the gel system after hardening in the lamp. In addition, guide lines are drawn on the forms that allow maintaining the same length of the extended nails.

To achieve best results, we recommend to:

- Perform mechanical and chemical preparation of the nail;
- Adjust the appropriate size of the forms;
- Form the shape and press the mass on the tip to the natural nail plate;
- Leave the tips until the mass solidifies in the case of using acrylic or until the mass solidifies in the lamp in the case of using gel and acrylogel.
- Carefully remove the mold;
- Upon completion of sanding the shape, apply the color, design or top coat.

JZ DISPOSABLE FILE & BUFFER SET

A universal set for manicure.
 Wooden File: 240 Grit, Buffer: 280 Grit.
 For professional and home use!

IQ PODO CUTICLE REMOVER

How to Use:

Apply a drop of REMOVER LOTION to the skin area around the perionychium (nail folds) that requires treatment, and begin processing immediately. Use a curette, pusher (axe), or orange stick to remove excess keratosis and cuticle. Remove product residue and the exfoliated keratinized skin with water (using a lint-free wipe).

**Avoid contact with mucous membranes. Keep away from children. For professional use only. In case of unpleasant sensations, remove product residue with water.*

Remover Lotion – An updated innovative formula for a delicate and effective approach to cuticle removal on the toes and general toe treatment in pedicure.

! The product has been refined specifically to speed up the treatment process, provide skin protection, and facilitate work on skin that is affected by bacteria, excess moisture, and nail plate lesions caused by dermatophytes.

! The product is suitable for skin with complications and an excessively lipid composition (silicone skin). It has an optimal pH for skin restoration, yet it works effectively and quickly in removing the keratinized cells of the cuticle..

- The combination of UREA and a small percentage of alkaline not only ensures high-quality removal of keratinized skin areas but also prevents skin dryness and cracking.

▪ INNOVATIVE COMPONENT: HYDROLYZED PEARL POWDER – It offers :

Rich Composition: Contains 17 amino acids, trace elements (calcium, magnesium, zinc, copper), B vitamins, as well as proteins and polysaccharides.

Stimulation of collagen and elastin production, smoothing the skin, increasing skin elasticity and tone. Promotes self-renewal.

Provides the skin with nutrients, saturates it with moisture, and eliminates dryness and peeling.

Protects the skin from the negative effects of the environment and free radicals, acting as an ideal antioxidant. Has high antimicrobial properties.

Relieves inflammation, redness, irritation, and soothes sensitive skin.

Regulates water and pH balance.

15,17 €

STEP 1
KERATOLYTIC

The main and first step in a pedicure is moisturizing and exfoliation of corns. Thus, thanks to 20 % UREA, namely urea, we owe the new stage of development of PODO cosmeceuticals.

Features:

- For all skin types
- No need for neutralization
- Work on all the levels of the epidermis
- Smart function of H₂O activation
- Antioxidants and antiseptic properties after the procedure
- Prolonged effect of all components, as well as the Here and Now effect, guaranteed improvement of the skin within a few days.
- For the diabetic foot
- Preserved pH balance of the skin
- Free of parabens and mineral oils

The IQ PODO keratolytic is primarily intended for providing the main components to all levels of the epidermis. Thanks to peptides and Aloe Vera, the IQ PODO retains moisture and, in combination with provitamin B5, soothes damaged areas and relieves them of stress.

This is the first keratolytic that require no duplication. It just has the “ON” button thanks to the water. Yes, it is water that is the activator of its components... As soon as it is absorbed by the skin, just do moistening with a napkin. Just do it using moisture, just H₂O. And its action will be re-started.

No neutralization is required.

For professional use only!

Work in nitrile gloves. For external use only. Keep out of the reach of children. Do not use on skin areas with dermal cracks and open wounds.

Do not allow the product to get into the eyes, on the face and hands.

After work, wash your hands with soap and water.

How to use:

Apply the product to the dry skin of the feet, constantly maintain moisturizing with a wet napkin. Within a period from 30 seconds to 2 minutes, wipe the skin with a wet napkin or paper towel, then start removing the softened skin from the foot. Rinse with water. To complete the procedure, apply the IQ PODO moisturizing and regenerating cream (step 2). Do not use the product more than once a week.

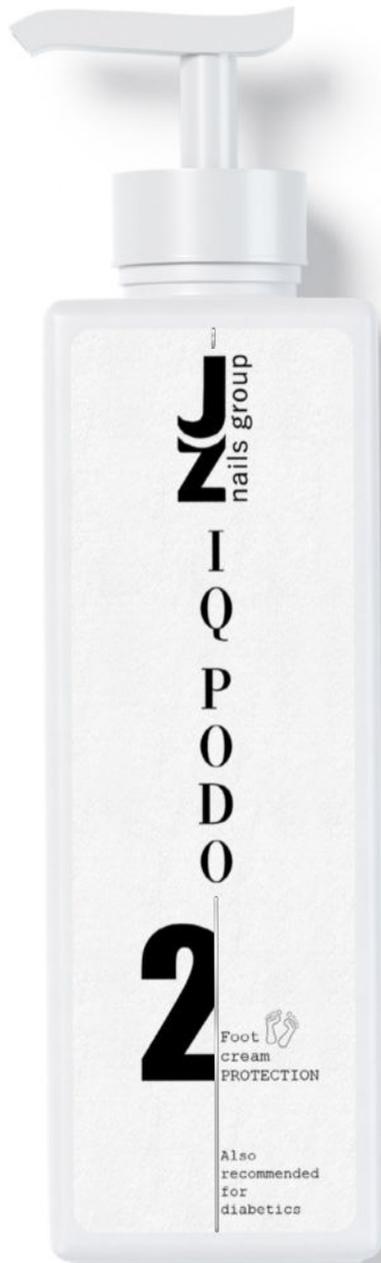

24 months, 6 months after opening

STEP 2

10,84 €

FOOT CREAM

The IQ PODO and STEP 2 in the line are nourishing creams with 5 % of urea and argan oil. It has a nourishing and soothing effect, thanks to the small mass of oil molecules and enzymes, it helps to moisturize the deeper layers of the epidermis.

Thanks to allantoin and argan oil, it protects and tones, restores damaged intercellular membranes. Polysaturated acids in the composition of OMEGA 3 and OMEGA 6 add elasticity, act as antioxidants and support the transepidermal H2O barrier.

The cream:

- improves the appearance of the feet skin from the first use and has a prolonged effect;
- soothes irritants and prevents the emergence of new ones;
- is quickly absorbed and does not leave a greasy film (FREE OF MINERAL OILS AND PARABENS)
 - is suitable for all skin types;
 - is an ideal home-use solution for xerosis
 - is recommended for diabetic foot
 - can be used by people older than 3 years

FREE fragrances | PARABENS | Waxes | Mineral oils

14,45 €

STEP 3

PEELING SOAP

The skin of the feet needs daily care:

- hygiene
- softening
- protection

- 1 This step can complement the IQ PODO procedure in the final phase or
- 2 it can be a completely independent substitute for keratolytic agent and subsequent moisturizing!

Enzyme-rich formula enriched with argan oil and shea oil, mucin that activates production of own collagen fibers. The entire formulation complex accelerates regeneration, promotes healing of damaged areas of the skin.

- It is recommended for diabetic foot.
- For xerosis
- And hyperkeratosis (2 to 3 times a week)

How to use:

Apply 2–3 drops of the ATOPI KERATOLYTIC JZ on the clean and moistened skin with a wet napkin, add the SOAP PEELING, distribute the mass over the skin of the foot with massaging movements (for 1–2 minutes). Then remove the remaining peeling particles with a wet napkin. If desired, a spray bottle with warm water can be used. H 2 O is an effective conductor of argan oil into the deeper layers of thick skin that ensures the accumulation of prolonged action.

The volume is 100 ml and 380 ml.

OIL HYDRATION 6,02€ 10ml 28,90€ 50ml

Regenerating restoring hydrophilic oil that contains more than 10 molecular oils presented as a unique combination are recommended for care and treatment of sensitive, eczematous, xerose skin, skin prone to seborrhea, cracks and even acne. The main oils are **AVOCADO oil** that acts as an antioxidant, has softening and anti-inflammatory effects.

JOJOBA oil, namely jojoba WAX, strengthens the intercellular "cement" layer of the skin. **LEMON PEEL OIL**, with its anti-seborrheic properties, has a slightly exfoliating effect, brightens the skin, and also treats acne. With fatty acids, vitamins A, C, U, **BRAZIL NUT oil** is a rich source of linolenic acid, nourishes and softens hair. Essential **CEDAR OIL** has fungicidal properties, soothes inflammation, and suppresses the tendency to dandruff.

BERGAMOTH OIL adds not only aroma, but also acts as a rich factor against seborrhea and acne formations.

ROSEHIP OIL is a source of vitamin C, rich in unsaturated fatty acids and vitamin F. **PALMAROSE OIL** has antifungal, bactericidal and antioxidant properties. It treats seborrhea, acne, and heals scars.

FOR SKIN AND FACE

Add a little amount of oil to your palms, distribute it over the pre-cleansed skin of the face with massage movements, add a little water, and continue massaging movements. Wash with warm water.

Oil can be added to serums and creams.

FOR HAIR :

.....

Apply to dry, damaged hair 20 minutes before washing.

Apply to wet, washed hair, comb strands and dry.

Add to conditioner or mask and perform the procedure as usual.

In seborrhea apply it to the scalp directly to the affected areas. Add oil to a mask for oily hair, then spread it with massaging movements and leave for 10 minutes.

FOR SKIN AND BODY:

.....

Apply to wet skin after shower (areas with stretch marks, cicatrices and scars. Or just apply drops of oil to healthy skin and distribute oil with your palms. Perform massage movements until the cosmeceuticals are fully absorbed. Apply oil to the damaged area (dry scars, dermal and epidermal cracks) with massaging movements.

FOR NAILS:

.....

Apply daily a drop of oil to the cuticle area and spread it with massaging movements over the surface of the nail and skin.

Oil can be used in resections of onycholysis. Apply daily one drop to the pre-treated area.

FOR TREATING THE FOOT IN PEDICURE :

.....

Add a few drops of oil to the treated surface of the foot, sand it with a podo-sponge, then add a little of water (1 spray with the dispenser) and continue the treatment with massage movements.
